'Sound & Sound Healing' A talk and workshop presented by David Ford

In the talk, which will last approximately an hour, the rationale of Sound Healing will be discussed. A simple definition is the therapeutic application of sound frequencies to the body/mind of a person with the intention of bringing them into a state of harmony and health.

The workshop will be an experiential Sound Bath. After a short guided meditation, a variety of instruments will be sounded. The benefits of a Sound Bath are best gained whilst lying down. It is important to be comfortable, so it is advisable to bring a duvet, or similar to lie on, a pillow for extra comfort and a blanket to cover yourself, as we can become cooler whilst lying in prone position for over 45 minutes. You might like to bring a scarf or eye mask to cover your eyes. Don't be surprised if you lose track of time during the bath.
